

Dr. Edward Sung completed his medical education at Emory University, followed by Radiology residency training at Boston University Medical Center. After residency, he pursued subspecialty fellowship training in Neuroradiology at Massachusetts General Hospital. After completing his training, he returned to Boston University Medical Center to join as a staff radiologist and Assistant Professor in the Neuroradiology and Emergency Radiology sections. His research interests include head and neck trauma, traumatic brain injury, and optimization of CT in neuroimaging.
