

Jeremy Erasmus

Jeremy Erasmus is a tenured Professor of Radiology at MD Anderson Cancer Center (MDACC). He is a clinically active thoracic oncology radiologist interested in PET/CT imaging and low-dose CT lung cancer screening. He was a collaborator in the NLST (National Lung Screening Trial) and is the Principal Investigator for the local/national/international MDACC lung cancer early detection and biomarker validation study.

He has published extensively on oncologic imaging and has more than 200 peer-reviewed manuscripts and over 40 book chapters. He is an associate editor for the *JTO* (Journal of Thoracic Oncology) and Section Editor for *Cancer*. Dr. Erasmus was president of the Society of Thoracic Radiology (STR) in 2014 and is involved in numerous academic societies. As a member of the IASLC (International Association for the Study of Lung Cancer) Staging and Prognostic Factors Committee and Upper Gastrointestinal Tract Committee for the AJCC, he is actively involved in developing new staging guidelines for esophageal and lung cancer.
